NUMBERS AND FACTS

OVERHANGING LOAD

Load

- Load must not obstruct the driver's view.
- Load must be properly secured and must not endanger anyone.
- Load must not cover the licence plate or the lights.

Dimensions passenger car

The maximum permitted dimensions of a passenger car, including load.

- A car must not be wider than 2.55 metres.
- On an unpaved road, a car must not be wider than 2.20 metres.
- A car must never exceed 4 metres in height.
- A car must not be longer than 12 metres.
- A car with a trailer must not be longer than 18 metres in total.

THEORY EXAM

OVERHANGING LOAD

What is divisible load and indivisible load?

You can disassemble divisible load or make it smaller. Examples of divisible load are stones, packages and groceries.

You can't divide or disassemble indivisible loads without incurring excessive costs or risks. Ladders and canoes are examples of indivisible load.

Overhanging load car

Front

- Divisible load must not project from the front.
- Indivisible load must not project more than 1 metre from the front.

Sides

- Load (indivisible and divisible) must not project more than 20 centimetres from the sides.

Rear

- Load (indivisible and divisible) must not project more than 1 metre from the rear.

TRAFFIC SIGNS

DEFINITIONS

with a red-white load sign of at least 42 by 42 centimetres when:

- The load projects more than 1 metre in length from the front or rear.
- The projecting load exceeds 10 centimetres in width (not for passenger cars).

Load sign

At night, a load sign on the front of the vehicle must be fitted with a white light and a load sign on the rear of the vehicle with a red light.

Overhanging load trailer

Front

- Load must not project from the front of a trailer.

Sides

- Indivisible loads may project if this is necessary for the transport, as long as the trailer including the load is not wider than 3 metres.

Rear

THEORIEEXAMEN ⓘ

not project more than half the length of the trailer from the front of 5 metres.

Example: your trailer has a length of 6 metres. The individual load must be no more than 1 metre from the rear as long as the load does not exceed (half the length of the trailer) 3 metres from the rear axle.

Load carrier

Examples of load carriers are bicycle carriers, ski boxes and luggage carriers. When transporting goods or cargo, a number of requirements must be met:

- The load carrier and the goods must be securely attached.
- The load carrier and goods must not protrude more than 1 metre from the rear of the vehicle.
- If a load carrier is made to carry only certain goods, no other goods may be carried.
- A load carrier must not carry more goods than it is designed for.
- If the load carrier or the goods cover the licence plate, the vehicle must be fitted with a white licence plate with the vehicle's registration number. If the licence plate is not visible, the licence plate must be provided with an approval mark.
- When the load carrier is attached to the tow bar, the maximum weight must not be exceeded.
- When transporting goods on the roof, a proper load carrier must be used. The maximum roof load may not be exceeded.

Lighting load carrier

If the load carrier or the goods cover the rear lights of the vehicle, the vehicle must be fitted with:

- 2 red rear lights
- 2 red brake lights
- 2 red retro-reflectors
- 2 direction indicators
